

Columbia College Forestry and Conservation On the Job Training Program

Management and restoration of fire-adapted ecosystems is critical to fire safety and forest health. Columbia College's On the Job Training (OJT) Program combined with course instruction will provide it's trainees the skills necessary to obtain employment in this exciting field.

The On the Job Training (OJT) program includes:

- ◆ 2,000 hours of paid on-the-job training
- ◆ Tuition paid and books provided
- ◆ Earn a Certificate of Achievement in the Management and Restoration of Fire-Adapted Ecosystems
- ◆ Receive a Certificate of Completion through the California Division of Apprenticeship Standards

16 units of Related Supplemental Instruction (RSI)

- ◆ Wildland Fire Control
- ◆ Ecology and Use of Fire in Forest Ecosystems
- ◆ Fire-Fuels Management
- ◆ Applied Forest and Inventory Management
- ◆ Ecological Restoration
- ◆ Excavator Mulcher Operation
- ◆ Basic Power Saw Safety
- ◆ CPR and Basic First-Aid

Projects may include:

- ◆ Fuels Management
- ◆ Hazard tree removal
- ◆ Trail Restoration
- ◆ Site clean-up
- ◆ And more!
